

## Join the Future of Family Medicine in Etobicoke / Toronto

**Build your career in a clinic designed for high-performing physicians who value clinical excellence without the administrative drag.**

We are launching a modern, community-based family medicine clinic in Etobicoke/Toronto, built for early-career physicians ready to shape the future of primary care. Our model prioritizes efficiency, continuity of care, and physician wellbeing.

---

### Why This Clinic Stands Out

#### Clinical Excellence Meets Operational Efficiency

- Say goodbye to endless charting: integrated AI scribes and smart documentation tools let you finish notes as the patient leaves.
- Zero-friction intake: patients complete medical history, updates, and consent forms online before their appointment.
- Closed-loop pharmacy integration: electronic refill requests, physician-pharmacy messaging, adherence alerts, and medication reconciliation.
- Smart scheduling: AI-assisted bookings, same-day urgent care slots, and manageable patient load (15–20 per day).
- Modern EMR & workflows designed to eliminate administrative headaches.

#### Sustainable Practice Model

- 4.5 clinical days + 0.5 admin/professional development day.
- Team-based support: collaborate with pharmacists, nurses, and billing specialists.
- Continuity of care prioritized over high-volume “walk-in” churn.
- Secure messaging and translation services (Proprio One) standard.

#### Early-Career Physician Growth

- Gradual onboarding: patient panel grows at your pace.
- Mentorship in modern clinic operations, technology, and workflow optimization.
- Opportunity to shape a forward-thinking, high-performance practice from the ground up.

---

### Ideal Candidate

We are seeking graduating residents and early-career family physicians who:

- Want a structured, supportive, and team-oriented community practice.
- Are motivated by efficiency and clinical impact, not just “flexible scheduling.”
- Value long-term patient relationships and sustainable practice.
- Are excited to integrate technology to enhance patient care and reduce burnout.

Compensation structure will be discussed individually and designed to be competitive and flexible based on physician preferences and practice style.

---

**Join us and experience the Operator Standard for Primary Care:** a clinic where technology, team support, and thoughtful design allow you to focus on what matters most—your patients. Interested residents are welcome to contact Dr. Mani Rakkar directly at [mani.rakkar@hotmail.com](mailto:mani.rakkar@hotmail.com) to learn more.
