

I am looking for a family physician to take over my practice of 1100 (1000 rostered) patients at Taddle Creek FHT in Toronto, steps from the Christie subway station. My office is shared with 2 collegial physicians and an NP, and we are part of a larger network of 18 family doctors. There is a lab and imaging in the building. EMR is Telus PSS which we have used for 18 years, and patients charts are well maintained.

My practice is made up of a diverse group of patients ranging in age from 0 to 100. Routine screenings are up to date. We are a FHO/FHT so patients have excellent access to a variety of programs and allied health professionals, including diabetes education, pharmacy, social work, nursing support, dietitian, psychiatry consultation. Our office has dedicated and competent administrative staff. We are a supportive, hard-working, and cohesive group of physicians. Delicious treats appear on a regular basis!

I would be open to locuming on a regular basis to ensure a smooth transition to practice, if desired. For further information please contact Bev Davis at guavastew@hotmail.com
