

Opportunity for long term locum &/or takeover of stable FHO of 700 patients. Hours flexible; in person &/or phone appointments if desired. Full details of ad posted below. Please contact clinic (see below) or Dr. Sarah Park directly at Sarahm.park@mail.utoronto.ca.

Are you waiting for your chance to jump into an established practice with both feet? Look no further. We're seeking an amazing family physician to join our team within the community of Leslieville. We find it a young and dynamic area of Toronto, with many young families and a diverse patient population. There is currently an opportunity to take over a stable well-managed practice of 700 patients at our Riverside location, or for longer term locum for consideration of taking over practice. At Magenta Health, you will practice in a warm, modern, tech-savvy clinic that offers flexibility and autonomy, supported by professional management and bright, caring colleagues.

For early career physicians, we offer mentorship from experienced physicians. Our leadership team draws from the wealth of experience earned by providing this type of support to a diverse group of new graduate physicians that have joined us throughout the years. For physicians at any stage of their career, we offer ongoing practice and career support through difficult times within the industry. We provide dedicated staff (RPNs, Medical Assistants, and more) to ensure physician success, to focus on your longevity and ward off burnout. Be the person who loves their job and enjoys coming into clinic to practice. There's no need to worry about hiring or training staff, or angst over negotiating leases. You'll hit the ground running - just start providing exceptional care to your new patients on day one.

ABOUT US: Established in 2014 by a small group of family physicians who continue to manage and practice within the clinics today, we are an award winning network of 30+ family physicians in the highly desirable Toronto neighbourhoods of Riverside, Midtown and the Beach.

We are driven by our values of providing top-notch patient care, a suitable work-life balance, and flexible schedules while working in a friendly and well managed environment. No matter the circumstance, we understand how to leverage cutting edge technology and efficient clinic processes to provide an elevated physician experience.

OUR TEAM: Underpinned by a team with a wide diversity of skills and background, including IT, project management, and legal, we develop customized software to reduce your day-to-day frustrations; manage change so that it happens effectively; and support you when dealing with challenging patient situations. We also engage externally: we helped to pilot and shape the provincial approach to virtual care and most recently, to establish a community non-profit to represent and advance family practice.

OUR PATIENTS: We care for patients from all walks of life; and our clinics and physicians have a great reputation in the community. With our strong reputation in the community, patient demand continues to exceed our physician supply despite many of our physicians continuing to accept new patients via a new virtual intake process during the pandemic.

OUR COMMUNITY:

If you're looking to be a well supported and happy family doctor, reach out, and let's have a conversation. Contact us at careers@magentahealth.ca, attention: Dr. Marco Lo.
